SKU: 43C525

Categories: [Aluminum Bass Boats](#), [Bass Boats](#), [Vexus](#)

Product Description

Live Large and Take Charge™ in a Vexus V2 design! The ultra-spacious layout and focused performance of the AVX1980 are engineered to overshadow every other aluminum rig in this 19' 10" class. Shaping the all-out machine, our next gen V2 technology allows us to incorporate huge interiors and weather-sealed gear storages. Case in point, the oversized front deck includes roughly a foot of additional width at the seat base. That's some serious room! Likewise, the super quiet pad hull is engineered with specialized lifting strakes, supercharged hole shots, responsive handling, and incredible stability. Ultimately, it's a groundbreaking approach to innovation with the kind of repeatable consistency that drives every 1980 to run stronger, drier, faster, and exceptionally smooth. Combined with stretch-formed gunnels, this feature-rich ride carries a confidence so advanced, it's often mistaken as a hand built fiberglass rig. Highlights of the cockpit include the fluid feel of SeaStar™ Pro hydraulic steering, a full array of instrumentation, an abundance of leg room, and adjustable driver's seat. Elsewhere, the tour-level livewell, insulated cooler, dual rod boxes, and our custom-fitted trailer are among the 1980's long list of standard features. You even have your choice of outboard, trolling motor, and electronics. With so much room inside and the front deck so large, fishing this rig is like having your own 'Landing' strip! So load up and take off in an AVX1980 with V2 Technology. It's the kind of quality, innovation, and performance that's made to fly. Vexus® V2 Technology Available with Power of Choice Professionally Rigged Outboards All-Welded AVX High-Performance Hull (.125" thickness-bottom and sides) Vector Force™ Solid Transom Dense Base™ Superstructure Design Stainless Steel Prop Crank Battery includes Battery Tray and Tie-Down SeaStar™ Pro Smooth Hydraulic Steering Flush-Mounted Remote Throttle Control Tournament Grade Fiberglass Aerated Livewell with Anti-Splash Ring, Divider and Pump-Out Bow Trim and Navigation Light Switches Speed, Tach, Fuel, Trim, and Water Pressure Gauges Balanced Weight Distribution & Design Trac-Tight™ Handling 35-Gallon Fuel Tank Hard Case™ Paint with Clear Coat Protection Stretch-Form Gunnels Raised-Lip Construction and Weather Trim Seal on Rod Boxes and Storage Compartments Custom Painted-to-Match Fiberglass Console All Exterior Surfaces Painted Lid Undersides Painted Large Diameter SS Seat Pedestals Marine Grade Carpet Fiberglass Control Panel, Bow Panel with Integrated Recessed Trolling Motor Pedal Tray Insulated Fiberglass Cooler Wood-Free Construction
