Product Description

Wide Open... It's a term that describes both the room in and opportunity with the AVX1880c. Engineered from more than a half century of research, this slab-minded machine is built to home in and lock onto your favorite crappie spot. Designed in collaboration with "Mr. Crappie," Wally Marshall, this 18' 10" rig literally dwarfs other designs in its class. How'd we do this? We re-engineered the entire platform from the ground up, not only creating a new generation of product but a whole new fabrication process. It's a level of excitement and inspiration that continually drives our team to raise the bar of expectations. Built from extensive computer modeling and real world performance tests, our groundbreaking V2 technology delivers a pad hull that's light on its feet and incredibly smooth, strong, quick, and dry. Combined with our stretch-formed gunnels, we brought the beam farther forward, making the front deck even larger. So, not only is there a world of room for three-across seating up front, but gear storage dominates, and rod space is equally impressive. Up front, the port box holds sticks up to 8' in length and there's room for rods in the double-digit range along the port and starboard sides. Elsewhere, the tournament-proven rear livewell and reverse-hinged forward well reinforce the all-out focus on fishing. Quick out of the hole, the 1880c runs with a smooth, solid ride that's often compared to glass. It's built on our exclusive, whisper quiet Hush Hull™ so you'll enjoy amazing stealth with the kind of hits that don't come from hull slap. At the helm, SeaStar™ Pro hydraulic steering is joined with a full array of performance instrumentation and your choice of electronics. Further equipped with a long wish list of standard features, this next-gen machine includes a built-in cooler, on-board charger, stainless steel prop, weather-sealed fiberglass compartments, tool and cup holders, a custom trailer with surge brakes, variety of cockpit seating options, and your choice of outboard and trolling motor. Check out the ride, room, response, and rewards of this easily trailered, crappie kingpin. Whether you're fishing near, far, deep, or shallow, the AVX1880c is another revolutionary design, redefining the ultimate aluminum standards. Vexus® V2 Technology Available with Power of Choice Professionally Rigged Outboards All-Welded AVX High-Performance Hull (.125" thickness-bottom and sides) Vector Force™ Solid Transom Dense Base™ Superstructure Design Stainless Steel Prop Crank Battery includes Battery Tray and Tie-Down SeaStar™ Pro Hydraulic Steering Flush-Mounted Remote Throttle Control Tournament Grade Fiberglass Aerated Livewell with Anti-Splash Ring, Divider and Pump-Out Bow Livewell/Baitwell with Easy Open Lid Trim and Navigation Light Switches at Bow Speed, Tach, Fuel, Trim, and Water Pressure Gauges Balanced Weight Distribution & Design Trac-Tight™ Handling 32-Gallon Fuel Tank
