Product Description

From flipping and pitching grass, pads, and brush to outmaneuvering every obstacle around low-hanging limbs and docks, nothing should get between you and the next bite. It's why we filled the VXs21 with so many advantages. At 21'11" in length, this keel-forward design is handcrafted with huge decks and shaved gunnels. It's a sleek, low-profile combination that not only makes it easier to target fish but opens up a massive amount of floor and interior space. So, whether you're tossing soft plastics, bumping a crankbait along a ledge, or slinging your favorite topwater, this all-out machine is performance built to keep you in the hunt. Dissecting the design, the huge, 97-inch beam is balanced with 58-gallons of fuel capacity below the floor. It's a revolutionary makeup that's precision engineered for responsive hole shots, incredible stability, and an amazing rough water ride. Combined with up to 300 horses of factory-rigged muscle, the VXs includes a full transom for more rear deck space and the power to keep accidental backwash at bay. The innovative layout also allows for direct mounting of shallow water anchors. Inside, each deck can either be fully carpeted or completely covered with the quick-drying, cushioned support of polyethylene vinyl. The forked front on this rig actually expands the room at the bow station. The result is a forward layout loaded with space for large, stacked electronics, shallow water anchor foot controls, cup and tool holders, and switches for the outboard trim and NAV lights. Plus, with so much added bow width, there's even more square footage for multiple anglers working side-by-side on the front deck. Storage in this streamlined missile is abundant. Up front, the landscape includes a 9-foot port rod box with a quick-draw shelf for your go-to sticks. Another 8-foot compartment centers the deck and is equipped with side slots for 3700-style boxes and even more room for gear below the rods. Just in front of the console, another large storage and day box are guarded by our Dri-Max™ system of rain channels, raised moisture dams, weatherized seals, and stainless steel compression latches. In the cockpit, the center step features tool holders and a slide-out drawer with slam latch for quick access to everything from your cell phone, wallet, and keys to cull tags, scales, and other heat-of-the-moment tackle and gear needs. Additional storage in the cockpit includes a hinged box in front of the passenger seating as well as open bins with cup holders positioned alongside the driver/passenger seating. Behind the seating is another ambidextrous slot for easy access to your fish net. In the middle of the cockpit, our Cold Spot™ cooler is built to keep iced drinks and snacks in good order throughout the day. The insulated design includes a pair of cup holders as well as a bump board tucked just below the cooler. It's an ideal spot that's both out of the way and extremely handy. Custom cockpit seating is highlighted by adjustable slides as well as the soft, resilient comfort of AirWave™ pedestals. It's all part of the legendary Vexus® ride and feel. At the helm, the aggressively raked console includes speed, tach, fuel, trim, and water pressure instrumentation as well as the smooth, responsive handling of SeaStar™ Pro hydraulic steering. There's also an abundance of room for multiple graphs. Combined with a running rod rack, driver/passenger footrests, and choice of handrail options, the wide open cockpit is built for quick movement bow to stern while keeping rods and gear

all within easy reach. Centering the rear deck, our patented Intensive Care™ livewell is armed with recirculating aeration, clear view cull lids, and a pump-out feature. The breakthrough design is insulated and touts a revolutionary slosh-free setting, helping deliver unmatched care of your catch, even in the roughest waters. Oversized storage boxes with built-in shelves surround the well and include air shocks, raised moisture dams, weather seals, and compression latches. The rear power compartment is equally spacious with room for up to five batteries, a multi-bank charger, master power switch, our Vexus® View 6-gauge inline harness, and easy access to plumbing and pumps. Resting on a custom-matched, tandem axle trailer with hydraulic surge brakes, 17-inch aluminum wheels, hybrid oil hubs, ultra-bright LED lighting, swing-away tongue, torsion axle suspension, and our Victor Shield™ protective coating on the frame, the VXs21 is a full-featured, tour-level machine. Bow to stern, the streamlined contours are built to get close, lay low, and stay quiet, keeping you in perfect position for chasing dreams and catching limits. Available with Power of Choice Professionally Rigged Outboards Infused Composite Construction™ Exclusive ICC Hull Lamination Schedule Passive Keyless Ignition Stainless Steel Prop Crank Battery (Includes Battery Tray and Tie-Down) SeaStar™ Pro Smooth Tilt Hydraulic Steering Flush Mount Throttle Control Patented Intensive Care™ Livewell System with Oxygenator™, Cull View Lids, and Slosh Free Setting Keel Mounted Fuel System with Lower Center of Gravity Baffled and Epoxy Coated Fuel Tank
