Product Description

High-Output Alternator An 18-amp alternator helps keep batteries charged and fishing electronics humming long into the evening bite. Command Thrust Gearcase Designed to sit lower in the water and turn larger props, the available Command Thrust gearcase lifts heavy boats on plane more easily and holds them there at lower speeds without impacting top speed. Electronic Fuel Injection (EFI) From the moment you crank the engine to the moment you drop the throttle, EFI technology responds with instant power. Surefire starting in all weather conditions. Smooth, efficient acceleration. Maximum fun. Convenient Maintenance We made maintenance easier with features like color-coded touch points, an easy-access water-separating fuel filter and an oil filter drip tray, which helps you get the job done with less mess.
